ANISH KUMAR

Data Analyst | Aspiring Data Scientist

Dhanbad, Jharkhand | +91 8084331516 | anishkumar.ak.job@gmail.com | LinkedIn | GitHub

Data Analyst and MBA (Data Science) student with hands-on experience in Python, SQL, Tableau and Power BI. Completed four data projects covering startup funding analysis, API data extraction, a business dashboard and Instagram data analysis. Data Science Intern at Oasis Infobyte (recognized as a Star Performer) and former Teaching Assistant at Coding Ninjas. Seeking an entry-level Data Analyst or Junior Data Scientist role.

EXPERIENCE

Sep 2026 – Oct 2026
Data Science Intern | Oasis Infobyte (AICTE OIB-SIP)

- Completed the one-month AICTE OIB-SIP internship in Data Science and received a certificate of completion.
- Recognized as a Star Performer of the AICTE Oasis Infobyte internship with a certificate of appreciation.
- Received a letter of recommendation from the Program Coordinator citing strong analytical and problem-solving skills, on-time delivery, and the ability to work independently and in a team.

July 2023 – Nov 2023
Teaching Assistant | Coding Ninjas (Sunrise Mentors Private Limited)

- Conducted doubt sessions for students.
- Debugged students' code.
- Helped students with their assignments and projects.

PROJECT

Indian Startup Funding Analysis | Python, pandas, Matplotlib | GitHub

- Analyzed funding data of Indian startups from January 2015 to August 2017 to find the top cities, top investors, investment types and funding trends.
- Cleaned and prepared the dataset (missing values, inconsistent names, date and amount formats) before analysis.

StayCatin Property Analytics Dashboard | Tableau | GitHub

- Built an interactive dashboard from property listing, review and price-history data to help business management make pricing and listing decisions.

- Analyzed how prices changed over time and how reviews relate to listings.

Movie Data Extraction using TMDb API | Python, REST API, pandas | GitHub

- Collected movie, production company, actor and actress data from The Movie Database (TMDb) API using Python.
- Converted the JSON responses into a structured pandas Data Frame and cleaned it for analysis.

InstaBot - I | Python | GitHub

- Analyzed the habits of food bloggers on Instagram, collecting data such as post hashtags, top likes and average likes.
- Automated Instagram log-in with Python, searched for food content and profiles, and extracted profile data such as followers and likes.

EDUCATION

Master of Business Management in Data Science | Manipal Academy of Higher Education, Manipal University | 2024 - 2026

Bachelor of Arts (BA) | P. K. Roy Memorial College, B.B.M.K. University | 2016 - 2019

Intermediate | All India Council for Open Education (AICOE) | 2016

Matriculation | Jawaharlal Nehru Memorial Sr. Sec. School, CBSE | 2014

SKILLS

- **Programming Languages:** Python, SQL, R (basic)
- **Python Libraries:** pandas, NumPy, Matplotlib, Seaborn
- **Data Visualization and BI Tools:** Tableau, Power BI, Microsoft Excel
- **Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA), Statistics and Probability, Machine Learning Basics, REST API Data Extraction
- **Tools:** Jupyter Notebook, Git, GitHub

CERTIFICATION

- Data Science and Machine Learning, Coding Ninjas (2022 - 2023)
- Introduction to Data Analytics, Coursera
- Excel Basics for Data Analysis, Coursera
- Modern Data Warehouse Analytics in Microsoft Azure, Coursera

LANGUANGES

- English
- Hindi
